MARCH 98

Crude Oil Price Bulletins Nos. 98-025 through 98-036
(Effective 7:00 A.M. on Dates Shown Below)

This bulletin shows prices and gravity adjustments posted by Amoco Production Company (Amoco) for purchases of crude oil and condensate. Prices are based on the use of 100% mutually acceptable automatic measuring equipment with customary adjustment of volume and gravity for tank tables or temperature and full deduction for basic sediment and water.

Subject to change without notice, Amoco will pay the prices shown for merchantable crude oil and condensate delivered for its account into the facilities of its authorized receiving agency. Merchantable crude and condensate is defined as virgin crude and/or condensate produced from wells which is free of injected or outside foreign contamination, added chemicals containing but not limited to halogenated organic compounds and oxygenated compounds and which is fit for normal refinery processing. Seller warrants that the crude oil and condensate delivered to Amoco shall be merchantable quality as defined above and fit for normal refinery use. Prices are shown for 40° gravity and above, except as noted.

All prices may be subject to deductions for trucking and other charges where applicable. In the event government regulations require adjustment to Amoco's prices or effective dates, Amoco reserves the right to amend these prices and recover any excess payments by withholding payments from future settlements or by separate invoicing.

DECEMBER 97

Crude Oil Price Bulletins Nos. 97-156 through 97-166
(Effective 7:00 A.M. on Dates Shown Below)

This bulletin shows prices and gravity adjustments posted by Amoco Production Company (Amoco) for purchases of crude oil and condensate. Prices are based on the use of 100% mutually acceptable automatic measuring equipment with customary adjustment of volume and gravity for tank tables or temperature and full deduction for basic sediment and water.

Subject to change without notice, Amoco will pay the prices shown for merchantable crude oil and condensate delivered for its account into the facilities of its authorized receiving agency. Merchantable crude and condensate is defined as virgin crude and/or condensate produced from wells which is free of injected or outside foreign contamination, added chemicals containing but not limited to halogenated organic compounds and oxygenated compounds and which is fit for normal refinery processing. Seller warrants that the crude oil and condensate delivered to Amoco shall be merchantable quality as defined above and fit for normal refinery use. Prices are shown for 40° gravity and above, except as noted.

All prices may be subject to deductions for trucking and other charges where applicable. In the event government regulations require adjustment to Amoco's prices or effective dates, Amoco reserves the right to amend these prices and recover any excess payments by withholding payments from future settlements or by separate invoicing.
