Dear Mr. Grynberg:

This is in response to your April 20, 1999, Freedom of Information Act (FOIA) request (copy enclosed). I advised you on April 21 that as of October 1998 we no longer consider production data as proprietary. Kathy Ciferri of our Accounting and Reports Division is the contact person for that data and will provide the production data for January 1998 through February 1999 directly to you. I also advised that the prices and values from the royalty reports are proprietary and our policy is to routinely withhold that information. You agreed to just have Ms. Ciferri provide the production data for now.

On May 14, 1999, I contacted you to confirm that you had received the production data and to see if you wanted to pursue getting the royalty data. You stated that you did not want to pursue getting the royalty data. You also said you had received the production data, except for one property which Ms. Ciferri was having difficulty identifying. Based on this information, we are closing your request.

If you have any questions, please contact me at (303) 231-3013.

Sincerely,
Original Signed By

RE: BOC INFORMATION

Dear Greg:

As Ken Vogel will tell you, we are presently calculating the damages from BOC Gas's underpayment of royalties for both carbon dioxide and hydrocarbon gas produced by BOC in the McElmo Dome area of Montezuma County, Colorado.

Under the Freedom of Information Act, would you please fax to me the monthly production from September 1998 through February of 1999, and as soon as you get March production, would you please fax me the March production as well. BOC has supplied me with production data and prices until ~~September~~ ^{2/1} of 1998. For some reason or other, they have not supplied me with the balance.

I would like to get both the monthly volumes and the prices that they use for royalty payments, but please do not wait until you get permission to release the prices from BOC, and fax the volume to me as soon as you can.

I am talking specifically about the following leases:

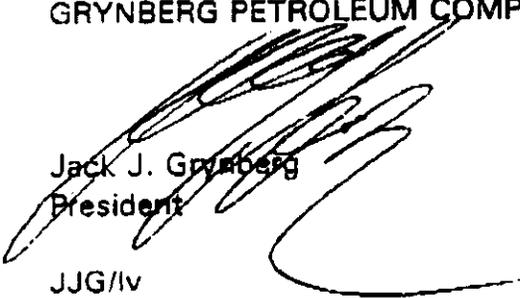

COC38421
COP58692
COC18092
