NOTE: March 31, 2001, ended on a Saturday. March payments were not due until Monday, April 2. Although many payors submitted their reports in March, some may have deferred until April 2. March sales volumes and collections may be lower than would normally be expected and April sales volumes and collections may be higher than normal. This is difficult to measure during a period of significant price escalation. A review of the March and April reports suggests little, if any, effect on March and April reporting. Any month-to-month distortion of this type will be resolved over an extended period of time. Annual report totals will reflect accurate information. Please see [\\*Important Notice](#).

NOTE: June 30, 2001, ended on a Saturday. June payments were not due until Monday, July 2. Although many payors submitted their reports in June, some may have deferred until July 2. June sales volumes and collections may be lower than would normally be expected and July sales volumes and collections may be higher than normal. Any month-to-month distortion of this type will be resolved over an extended period of time. The distortion may be reduced by combining data for June and July or by averaging sales volume and collections between the two months. Annual report totals will reflect accurate information. NOTE: June 30, 2001, ended on a Saturday. June payments were not due until Monday, July 2. Although many payors submitted their reports in June, some may have deferred until July 2. June sales volumes and collections may be lower than would normally be expected and July sales volumes and collections may be higher than normal. This is difficult to measure during a period of significant price volatility. A review of the June and July reports suggests little, if any effect on June and July reporting due to this phenomenon. Any month-to-month distortion of this type will be resolved over an extended period of time. Annual report totals will reflect accurate figures. Please see [\\*Important Notice](#).
